### Pharmacy Benefits Updates

Reminder: Cost-share Change for Specialty Drugs Packaged for More Than 30 Days

**Reminder:** Quarterly Pharmacy Changes are published in two parts. The part 1 article covers changes that require member notification – drug list revisions/exclusions, dispensing limits, utilization-management changes and general information on pharmacy benefit program updates. Our members receive letters regarding these changes. The part 2 article includes updates that do not require member notification. Those changes will be published closer to the April 1, 2025, effective date.

# Drug List Changes

Based on the availability of new prescription medications and Prime’s National Pharmacy and Therapeutics Committee’s review of changes in the pharmaceuticals market, some revisions (drugs still covered but moved to a higher out-of-pocket payment level) and/or exclusions (drugs no longer covered) will be made to the [Blue Cross and Blue Shield of Oklahoma](#) drug lists, effective on or after April 1, 2025.

The April Quarterly Pharmacy Changes - Part 2, which has recent coverage additions, will be published closer to that April 1 effective date.

Your patient(s) may ask you about therapeutic or lower cost alternatives if their medication is affected by one of these changes.

**Drug-list changes are listed on the charts below, or you can view the April 2025 drug lists on the [member website](#).**

# Utilization Management Program Changes

Utilization Management programs are implemented to regularly review the appropriateness of medications within drug-therapy programs, and as a result, may adjust dispensing limits, prior authorization or step-therapy requirements. The following drug programs reflect those changes.

## Standard Prior Authorization Program Changes – Effective April 1, 2025

Changes to drug categories and/or medications will be made to the Prior Authorization (PA) programs for standard pharmacy benefit plans. This includes ASO groups with a standard UM package and/or subcategory selection with auto updates.

For groups that have not selected the auto update, these programs will be available to be added to their benefit design as of the program effective date.

Members received letters regarding the program changes listed below. All changes are effective April 1, 2025.

## Dispensing Limit Changes

The prescription-drug benefit program for BCBSOK includes coverage limits on certain medications and drug categories. Dispensing limits are based on U.S. Food and Drug Administration approved dosage regimens and product labeling.

BCBSOK does not notify members of dispensing limit changes as most identified impacted members are not at risk of exceeding the limits.

View the most up-to-date drug list and list of drug dispensing limits, visit the [provider pharmacy webpage](#).

If your patients have any questions about their pharmacy benefits, please advise them to contact the number on their member ID card. Members may also log in to [Blue Access for Members<sup>SM</sup>](#) or [MyPrime.com](#) for more online resources.

# Pharmacy Benefits Updates

Visit the [our pharmacy page](#) for resource materials. Stay tuned to [Blue Review](#) for additional Pharmacy Program updates.

## Reminder: Cost-Share Change for Specialty Drugs Packaged for More Than 30 Days

Select specialty medications have FDA approval to be dispensed in a supply greater than 30 days and/or the drug manufacturer has limitations with packaging that cannot be broken into only a 30-day supply.

By applying member cost-share according to the actual day-supply amount filled, this change ensures members are paying for what they are filling, based on their benefits. For example, members receiving a 90-day supply of specialty medication will pay an applicable copay for a 90-day supply instead of the current 30-day supply cost share amount.

The change began Jan. 1, 2025. Members that are impacted by this change will be sent an awareness notification letter at least 60 days prior to their effective date. Small Group, Blue Balanced Funded<sup>SM</sup> and Custom Fully Insured group members with an April, May or June renewal were sent a letter in January 2025 to alert them about this change.

<sup>1</sup>Third-party brand names are the property of their respective owner.

<sup>2</sup>This list is not all inclusive. Other medicines may be available in this drug class.

<sup>3</sup>Coverage of medications is still subject to the limits, exclusions and out-of-pocket requirements based on the member's plan.

\*This drug is based on group-specific coverage. Members should refer to their benefit materials for coverage details or call the number on the back of their member ID card.

**Please note:** If coverage of the member's medication is changed on their prescription drug list, the amount the member will pay for the same medication under this preventive drug benefit may also change.

The information mentioned here is for informational purposes only and is not a substitute for the independent medical judgment of a physician. Physicians are to exercise their own medical judgment. Pharmacy benefits and limits are subject to the terms set forth in the member's certificate of coverage which may vary from the limits set forth above. The listing of any drug or classification of drugs is not a guarantee of benefits. Members should refer to their certificate of coverage for more details, including benefits, limitations and exclusions. Regardless of benefits, the final decision about any medication is between the member and their health care provider.
